

Greetings From Buffalo Valley

Postcards of Buffalo Valley – Tennessee

The village of Buffalo Valley is situated on the Caney Fork River, in the extreme western end of the county, and takes its name from the large and fertile valley at the mouth of which it nestles. Tradition tells us that long before settlement had been made here that a rank growth of cane covered many square miles and that herds of buffalo would come down from the mountains to graze through the winter, when other pasturage was dead or scarce. An old tradition current among the early settlers is that a huge buffalo was killed in the valley near the old Alcorn place, and from this circumstance the valley gained its name.
