

CAPSHAW WATER TANK COMING DOWN

Putnam Co., TN

Monday, Mar 16, 2009, Herald-Citizen, Cookeville, TN

Herald-Citizen Photo/Ty Kernea
Workers from Elk Mountain Construction began demolition of the Capshaw water tank Monday. The 178 1/2-foot tank, believed to have been constructed in 1948, had not been in use by the Cookeville Department of Water Quality Control for several years due to it sitting so low on the city's water system.

The water tank has been the target of graffiti, as well. Elk Mountain was awarded the bid to bring the tower down, remove it from the site and restore the site for use by Capshaw Elementary School. The bid was \$39,850.
